Short Course

Innovation in Educational Technology for Blended Learning Environment

By Ts. T.J. Iskandar Abd. Aziz

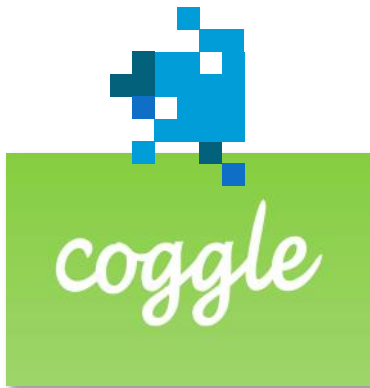

Another popular short course by TLC entitled “Innovation in Educational Technology for Blended Learning Environment” was conducted by Ts. T.J. Iskandar Abd Aziz on the 24th of May 2019. The course emphasised on the importance of understanding students, lecturers and the digital environment and how to develop teaching strategies for digital citizens. The participants had the opportunity to learn the latest educational technology and tools to enhance their teaching delivery. In addition, the course highlighted the concept of flipped classroom and current blended learning practices at UNITEN.

Some highlighted tools included:

- *Mentimeter*
- *Padlet*
- *Google sites*
- *Plickers*
- *Coggle*

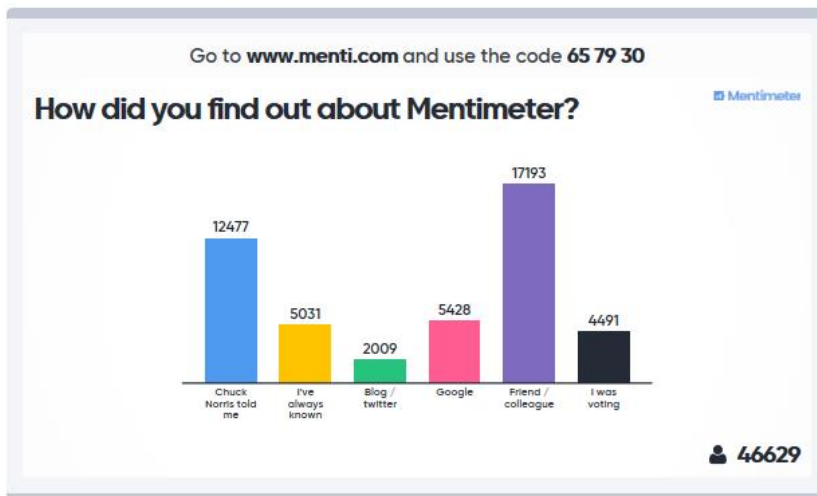

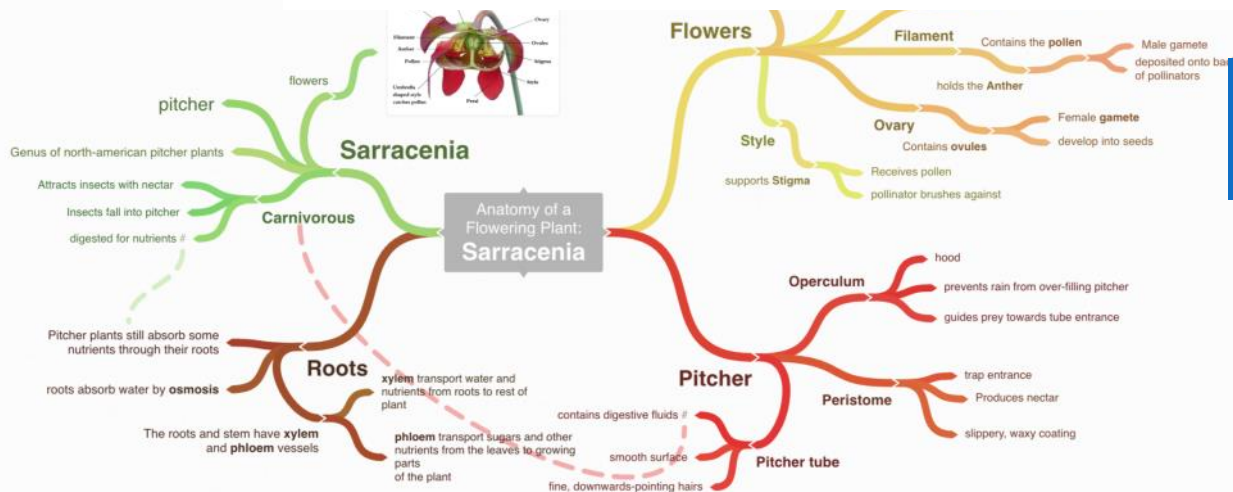

Educational Technology Tools

Students engage with technology outside of the classroom daily and most of the time. They are a generation of interactive learners. Technology use is part of their lifestyle thus should also come into classroom teaching and learning. In this issue, we present Coggle and Mentimeter—two great learning tools that help students understand lessons better. Coggle promotes structured mindmapping while Mentimeter collects students responses out of a discussion topic.
